

Harrison Tran

(714) 260-1097 | harrisontran357@gmail.com | github.com/harrisonharrisonharrison

EDUCATION

University of California, Irvine

Irvine, CA

Bachelor of Science in Computer Science

Expected Graduation: June 2028

- GPA: 3.75 / Dean's Honor List
- Relevant Courses: Python Programming & Libraries, Programming in C++, Boolean Logic & Discrete Structures, Discrete Mathematics, Data Structures & Algorithms, Probability & Statistics, Machine Learning & Data Mining

EXPERIENCE

Full-Stack Developer

Oct. 2025 – Present

Global Creation Foundation

Irvine, CA

- Developing a management platform supporting **300+** students across **5** continents for a nonprofit organization
- Engineered a **React** frontend dashboard, integrating user authentication and account recovery with **Firestore**
- Implemented backend services with **PostgreSQL** and **AWS S3** integration for efficient media upload workflows
- Developed **8+** reusable **Express.js** endpoints, streamlining data retrieval between the frontend and database
- Collaborated in a 14 person **Agile Scrum** team, working with designers to ensure alignment with customer goals

API Developer

Oct. 2025 – Present

ZotBins

Irvine, CA

- Partnered with the AI classification team to create endpoints accessing raw, inferred, and vetted waste outputs
- Containerized APIs using **Docker** for deployment, while testing and documenting routes via **Swagger**
- Migrated legacy **Express.js** routes to high-performance **C# REST** endpoints, reducing latency by **40%**
- Reduced infrastructure costs by documenting local database backup workflows and automating backup processes

Full-Stack Developer

June 2025 – Apr. 2026

FUSION

Irvine, CA

- Rebuilt FUSION at UCI's website with 9 developers to improve usability for **300+** members and external partners
- Implemented mobile responsiveness across pages, ensuring streamlined content delivery through **Tailwind CSS**
- Leveraged **ChakraUI** to create **10+** front-end components, following **Figma** specifications created by designers
- Provided 1-on-1 mentorship to beginner developers, guiding them to successfully merge **5+** pull requests

PROJECTS

Ridesheets

Apr. 2026

- Engineered a carpool management Slack bot in Python, successfully serving **150+** active users for group events
- Designed user interfaces leveraging Slack Block Kit API, resulting in a **50%** increase in overall user interaction
- Integrated **Firebase Firestore** for data persistence, ensuring highly available reads/writes for concurrent users

FU-Stamps

Aug. 2025

- Developed a study hours stamp card platform replacing physical cards, enabling QR-code based prize redemption
- Collaborated with 4 developers to integrate secure login functionality with **JWT authentication** in **TypeScript**
- Leveraged **Next.js** and **Supabase** to allow members to log attendance, track stamps, and redeem rewards online

Crosswalk

June 2025

- Designed the **UI/UX** of Crosswalk, an app that prepares users for licensing by reviewing DMV handbook topics.
- Created interactive prototypes and user flows using **Figma** to improve engagement and comprehension by **20%**
- Conducted research with **60+** survey respondents, **6+** interviews, and **8+** user evaluations to inform iterations
- Won 2nd Place and Audience Choice award at UCI's largest design competition after an end-to-end design process

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML, CSS, R

Frameworks: React, Node.js, Flask, Next.js

Developer Tools: Supabase, MongoDB, Figma, Vite, Next Router, Git, VS Code, Visual Studio, PyCharm

Libraries: OpenAI API, Tailwind CSS, Chakra UI, BeautifulSoup
